ABOUT THE COLLEGE

Sri Vasavi College, Erode sponsored by Erode Vidhya Sangam is on its fifty first year of fruitful service in the cause of higher education. Started as a pre-university college in the year 1967, it has emerged as an outstanding institution of higher learning offering 9 UG courses, 4 PG courses and research programmes in 12 disciplines.

The Self Finance Wing was started in the year 1994 and it offers 12 UG courses, 3 PG courses, 6 M.Phil. courses. The college is a co-educational one and is affiliated to Bharathiar University, Coimbatore. Accredited by NAAC with B grade

The college is located 12km away from Erode on the Cochin-Chennai National Highway in a sprawling 27 acre campus. The college has about 250 computers housed in 8 labs with wireless internet connectivity. The library has a huge collection of 55000 volumes of books with 200 journals/magazines cater to the academic needs of 3000 students and 140 faculty.

ABOUT THE DEPARTMENT

The Department of Computer Science of the Self-Finance Wing lingers to be an igniting factor of intellectual development. It offers B.Sc and M.Sc Computer Science. The UG and PG course of the discipline emerged in the year 1994 and 1998 respectively. The department has a separate lab with 40 systems and internet connectivity. The computer science library governs about 7500 books and 30 national and international journals/magazines. The department has 9 university rank holders as feathers added to its achievements. The department serves with the motto of equipping its students to face the competitive modern world by providing various new platforms. The department has organized four national conferences, various seminars and workshops for the development of the learning community.

CONFERENCE PREAMBLE

Internet of things (IoT) is the vast network of devices connected to the internet, including smart phones and tablets and almost anything with a sensor on

it which enable these objects to connect and exchange data. Each thing is uniquely identifiable through its computing system but is able to inter-operate within the existing internet infrastructure. Experts estimate that the IoT will consist of about 30 billion objects by 2020. It is also estimated that the global market value of IoT will reach \$7.1 trillion by 2020. The aim of NCIoT 2018 is to provide a national open forum for the researchers and technocrats in academia as well as in industries from different parts of the country to interact, exchange concepts, prototypes, innovative research ideas and share outcomes of their research work which could contribute to the academic area. This conference will provide an excellent opportunity for the young researchers and academicians to expose their work.
